

# UC-260

## FEATURES AND CHARACTERISTICS

The UC-260 can be used as a wireless indoor siren, a melody doorbell or as a chime. It can also function as a small house alarm.

Compatible with Jablotron wireless control panels (JA-60 and JA-65), JA-60 wireless detectors and RC-11, RC-22 and RC-28 remote controls.

Several triggering devices can be used simultaneously and different melodies can be assigned to each device. Two different sound levels can be selected. The UC-260 provides entrance and exit delay chirps too, when used with a control panel.

## SPECIFICATION

	UC-260
Power supply	230 V, 50 Hz
Power consumption	1.5 W
Acoustics	8 melodies and/or 110 dB/m alarm siren
Input wireless devices	max. 8 remote controls or detectors, 1 control panel JA-60 or JA-65
Class	II according to EN60950
Working frequency	433,92 MHz
Environmental conditions	interior -10 to +40 °C
Safety standards	IP40 according to EN 60529, IEC 529
Complies with	EN 50131-1, class 2
