

Remote controller activated electrified safety bag

# DS Series “No-Touch”

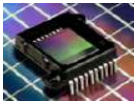

These bags are designed for the safe carriage of valuables such as cash, jewellery and important documents. In the hands of unauthorized people, it signals the panic alarm and is electrified with high voltage electricity. It even electrifies robbers wearing gloves. This temporarily stuns the robber and does not cause lasting harm.

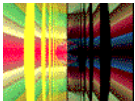

## FEATURES AND CHARACTERISTICS

Specially designed to increase durability

Two remote controllers provided for convenient usage both for the carrier and for security guards.

User friendly rechargeable battery provided.
