

LS-30

A system combining wireless security, home automation and IP technology, ushers in a new era for the smart home and business.

By adopting modern microprocessor control and communication technologies, the LS-30 is designed to provide the most advanced features you need to protect your home and business. The LS-30 is not only a security system but also a home automation controller that allows you to set as many as 16 programmable switches to execute daily commands throughout a whole week. With optional sensors, the LS-30 also operates as an environmental monitoring center to report floods, gas leaks and other hazards.

Being a powerful device, the interactive HMI (Human Machine Interface) programming technology, operation is simple. Simply by following the instructions on the LCD display and answering the questions with YES/NO buttons or entering digit keys, and the settings are done. Moreover, you can operate the system and read its status by using the proprietary GUI (Graphic User Interface) software **HyperSecureLink** through the Internet all over the world.

CHARACTERISTICS

Home / Business Security with Home Automation.

Easy installation and operation thanks to the user-friendly interface.

Up to 192 zones, suitable for all commercial and residential installations.

Easy to control over the Internet and mobile or normal phones.

Remote programming, save time with no need for site visits to upgrade or re-program.

FEATURES

IP-Based wireless security & home automation system
Remote control over Internet, telephone or mobile
Computer interface for downloading and uploading
System contains a maximum of 128 burglar zones plus 64 fire zones
Sensors are fully supervised by base unit to keep the system more secure
Provides RF signal strength indication to check radio range of sensors
Hopping-code remote controller for anti-copy
Easy to operate through a 16 character 2 line interactive LCD display
Each zone is programmable using various settings – Delay, Bypass, Switch Control, etc.
2 phone numbers for Central Station Monitoring
9 phone numbers for reporting of events to phones or mobiles, plus 1 pager number
Up to 11 user codes are available
Hands-free speakerphone, 2 way voice communication for emergency
Auto reporting to inform parents when children arrive home
Optional radio repeater to extend range
Wireless temperature sensor with programmable hi/low alarm limit
Emergency alarm and monitoring for the elderly
512 event log, stamped with time and date activation history
Scheduled 16 X-10 power switches for home automation
Full range of accessories
